by C-Section - to 6 LB. Baby Boy

A nine-year-old Chinese schoolgirl has become one of the world's youngest mothers after giving birth to a healthy boy.

The unnamed girl was brought to a hospital in Changchun, which lies in the north-east of the country, when she was eight and a half months pregnant.

Two days later, she gave birth to the 6lb boy by Caesarean section, according to official sources.

The 9 year girl gave birth to a healthy baby boy is said to come from the town of Songyuan (pictured) in north-east China. Her family refuse to discuss the pregnancy, but say they have reported it to the police.

Last night police were reportedly trying to establish who the father is.

PHOTOS PROVE THIS IS NO HOAX...

X-RAY REVEALS SPINE OF FETUS..

But	***No Problem for Arabs or Moslems***

But this story is very distorted and not really accurate at all.
The girl is only one and she does have a fetus inside of her, at least according to the X-rays and other tests being done on her.
However, the fact is - *SHE IS NOT PREGNANT AT ALL*.
Instead, she is actually a twin whose other twin ended up inside of her and did not develop. This is a very sad story indeed, but not about a child pregnancy, rather a twin inshide of a twin.

The media neglected to mention in any of the headlines, this is "NOT A PREGNANCY - IT IS A PROBLEM WITH TWINS AS FETUS".
Comments and forums have already begun to attack Saudis, Arabs and Muslims over issues of children being married too early, child brides, pre-teen pregnancies and child molestation.
Yet, as anyone can see, this is a case of twins who did not develop properly.
When will they learn - to tell the truth????
